Projects

Openverse

<https://openverse.org>

An open-source search engine for openly-licensed media.

openverse.org

Built at  WordPress

The primary channel to search across 800M+ creative works.

- Migrated the codebase to a monorepo with intricate CI/CD.
- Added privacy-friendly analytics for general usage metrics.
- Created safeguards to prevent sensitive content exposure.
- Evaluated & adopted PDM as the Python package manager.
- Developed the  environment for onboarding new devs.

API

<https://api.openverse.org>

Provides catalogue access to integrations via a RESTful API.

- Refactored to use Django REST framework best practices.
- Generalised to support new media types, such as audio.
- Created pipelines for individual & bulk content moderation.

Infrastructure

Openverse's IaC for AWS, Cloudflare & other services.

- Implemented monitoring with notification and alert workflows.
- Executed software & platform updates for all services.
- Performed periodic upkeep and rotation of resources.

pls

<https://pls.cli.rs>

A prettier and powerful  for the pros.

CLI application

An intuitive & elegant command-line interface.

- Enabled boundless customisation with cascading config files.
- Included niche features for power users, like Git integration.
- Added SVG support in terminal using Kitty graphics protocol.

Réци

<https://recivi.pages.dev>

A new kind of résumé for computers and humans, in that order.

Schema

<https://recivi.pages.dev/>

A new kind of résumé for computers and humans, in that order.

- Developed the JSON schema and TypeScript interfaces.
- This résumé was made with Réци as a proof-of-concept!

Website

Contains my homepage, interactive résumé and digital garden.

- Deployed as a static site with an automated CI + CD pipeline.
- Used low-tech frameworks to ship negligible JS to the client.

Other skills

Java (+ Swing, Spring), Kotlin (+ Android), Golang, PHP,

Web (+ HTML, CSS, JS, SVG), Shell (+ Bash, Zsh)

Roles

WordPress

<https://wordpress.org>

The open-source CMS that powers over 40% of the web.

Team lead

Dec-2024 – •Present

- Led a globally distributed, remote team of maintainers.
- Conducted regular 1:1s, team meetings, retros and meetups.
